Liquid Fund Performance (30-Day Net Yield<sup>6</sup>)

\*PFM Asset Management is a division of U.S. Bancorp Asset Management, Inc, which serves as administrator and investment advisor to the Fund.

<sup>1</sup> 7-day net yield, also known as the current annualized yield, represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a seven-day base period expressed as a percentage of the value of one share at the beginning of the seven-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 7.

<sup>2</sup> The monthly distribution yield represents the net change in the value of a hypothetical account with a value of one share (normally \$1.00 per share) resulting from all dividends declared during a month by the Pool expressed as a percentage of the value of one share at the beginning of the month. This resulting net change is then annualized by multiplying it by 365 and dividing it by the number of calendar days in the month.

<sup>3</sup> Weighted Average Maturity: Calculated by the final maturity for a security held in the portfolio and the interest rate reset date. This is a way to measure a fund's sensitivity to potential interest rate changes.

<sup>4</sup> S&P Global AAAm Rating: S&P evaluates a number of factors, including credit quality, market price, exposure, and management. Please visit [SPGlobal.com/Ratings](https://www.spglobal.com/Ratings) for more information and ratings methodology.

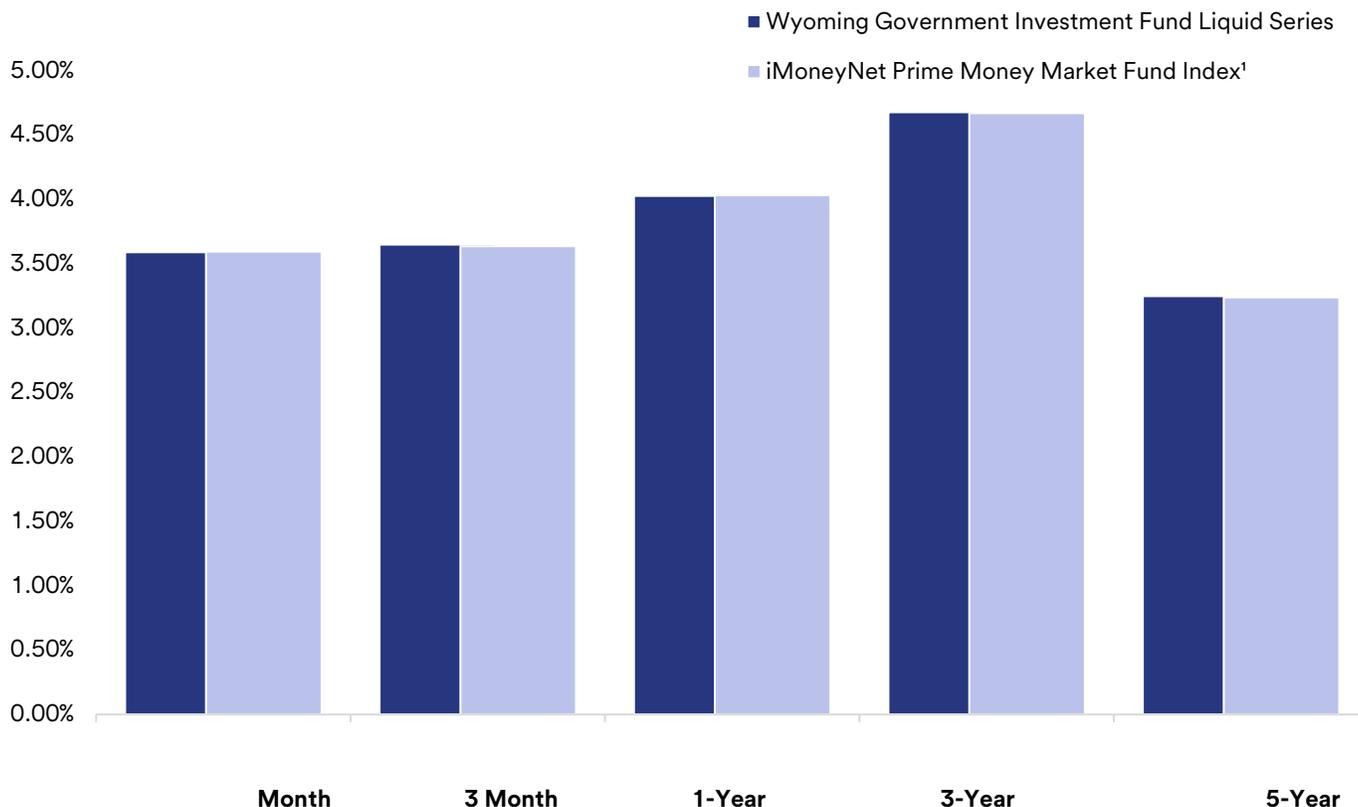

<sup>5</sup> Fitch AAAf Rating: portfolios with this rating indicate having the highest underlying credit quality. Please visit [fitchratings.com](https://www.fitchratings.com) for more information and ratings methodology.

<sup>6</sup> As of the last day of the month. The 30-day yield represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a thirty-day base period expressed as a percentage of the value of one share at the beginning of the thirty-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 30.

\*\*Percentages may not add to 100% due to rounding.
